ABOUT THIS RELEASE

These data cubes contain various cross-tabulations of the characteristics of wage and salary earners such as age, sex, occupation, wage and salary income and total income for the year 2002-03. They are an addition to the data cubes previously published under the catalogue number 5673.0.55.001. Most of the data in these tables are presented for each Statistical Local Area (SLA) in Australia. These data have been compiled from the Australian Taxation Office's (ATO) Individual Income Tax Return Database and are part of the Australian Bureau of Statistics' (ABS) program to increase the range of regional statistics available, particularly through the use of administrative information from other government agencies.

SPREADSHEET CONTENTS

The attached spreadsheets include various cross-tabulations of the characteristics of wage and salary earners such as age, sex, occupation, wage and salary income and total income for 2002-03. Most of the data in these tables are presented for each Statistical Local Area (SLA) in Australia.

These data have been compiled from the Australian Taxation Office's (ATO) Individual Income Tax Return Database and are part of the Australian Bureau of Statistics' (ABS) program to increase the range of regional statistics available, particularly through the use of administrative information from other government agencies. The ABS wishes to acknowledge the support the Australian Taxation Office has provided in compiling these statistics.

All individual income tax statistics provided to the ABS by the ATO have been in aggregated form only, at the SLA level. No information about individual taxpayers has been released to the ABS.

Details of the methodology and the definitions used to compile the statistics presented in these tables are available in the explanatory Notes and Glossary.
